

## Appendix 1: Description of expected applications of the thesis

*The purpose of this description is to, together with the document with the goal of the degree project, form a basis for assessing how well the degree project fulfills the criteria for the Swedish Engineers' Environmental Fund Scholarship*

### Student

Applicant's name and which programme you are studying at (i.e. the programme on which the degree project will be used to obtain the degree).

### Name of the thesis

Enter the name of the thesis.

### Which climate or environmental problem does the thesis contribute to solving?

Brief description of which climate or environmental problem the degree project will solve (max. 800 characters). Also describe the expected result (if it cannot be deduced from the degree project's target document).

### Implementation

Briefly describe (max. 800 characters) how the results of the degree project may be implemented and by whom or which.
